

25. 答案: C

$$\text{冷氣機嘅用電量} = (1200) \times (250) \text{ Wh} = (1200/1000) \times (250) \text{ kWh} = 300 \text{ kWh}$$

$$\text{電視機嘅用電量} = (250) \times (80) \text{ Wh} = (250/1000) \times (80) \text{ kWh} = 20 \text{ kWh}$$

$$\text{電腦嘅用電量} = (150) \times (60) \text{ Wh} = (150/1000) \times (60) \text{ kWh} = 9 \text{ kWh}$$

$$\text{所以，電費} = (300 + 20 + 9) \times 0.86 = \$ 282.94$$

所以答案為 C。
